

**SG V 100 S/O PC****General Information**

The "SG V 100 PC" gas burner is a blown-air burner which can operate with natural gas, LPG, lean gas and gas with low calorific power (on request).

Burner operation may be automatic or semiautomatic, and burner is equipped with electric ignition and detection electrode.

This burner is classified as a "high/average speed gas burner", with exhaust gases speed coming out from the combustion chamber racing from few m/s to 100 m/s, or even higher speed according to the outlet diameter of the burner cone.

Combustion air temperature may range from room temperature to 100°C.

Max. Thermal power is 1160 kW (1000 Mkal/h) and min. thermal power is 20 kW (17.2 Mkal/h).

Because of its flexibility, this burner may be adjusted with a wide capacity range up to a 58:1 ratio.
